

**SPECIAL ISSUE ON THE 7TH INTERNATIONAL MULTICONFERENCE
ON ENGINEERING AND TECHNOLOGY INNOVATION 2018 (IMETI 2018) (2)**

PREFACE

This special issue presents 35 papers selected from the Proceedings of the 7th International Multiconference on Engineering and Technology Innovation (IMETI 2018), which was held on November 2–6, 2018, in Taoyuan, Taiwan. The articles in this special issue focus on the newest findings and applications of sensors, including fundamental studies, industrial practices, and engineering innovations by applying sensor technologies. All of the articles underwent a rigorous peer review by at least two reviewers. Acceptance into this special issue was based on the reviewers' recommendation, mandatory revisions, and final examination by the Guest Editor. It is expected to be a crucial issue that might stimulate researchers to explore various sensor technologies.

It is my great honor to organize this special issue in *Sensors and Materials*. I would like to thank all the authors who have contributed their original work to this issue. I would also like to express my deepest thanks to the reviewers for taking their time to comment on the papers. Lastly, special thanks must be given to the Editor-in-chief, Prof. Makoto Ishida, and Ms. Misako Sakano, Editorial Department of MYU K.K., for their kind and proficient support to the publication of this special issue.
