

**SPECIAL ISSUE ON THE 8TH INTERNATIONAL MULTI-CONFERENCE ON ENGINEERING
AND TECHNOLOGY INNOVATION 2019 (IMETI2019) (1)**

PREFACE

This Special Issue presents 15 papers selected from the proceedings of the 8th International Multi-Conference on Engineering and Technology Innovation (IMETI2019), which was held on November 15–19, 2019, in Kaohsiung, Taiwan. The articles in this special issue emphasize the newest findings and novel applications of sensors, including fundamental studies, industrial practices, and engineering innovations by applying sensor technologies. All of the articles went through a rigorous peer review by at least two reviewers. Acceptance into this Special Issue was based on the reviewers' recommendation, mandatory revisions, and final examination by the Guest Editor. It is expected to be a key issue that might stimulate researchers to explore sensor technologies.

It is my great pleasure and honor to organize this Special Issue for *Sensors and Materials*. I would also like to express my deepest thanks to the reviewers for taking their time to comment on the papers. Moreover, I would like to thank all the authors who have contributed their original works to this Special Issue. Lastly, special thanks must be extended to the Editor-in-Chief, Prof. Makoto Ishida, and Ms. Misako Sakano, Editorial Department of MYU K.K., for their kind and professional support to the publication of this Special Issue.

Prof. Wen-Hsiang Hsieh
