

**SPECIAL ISSUE ON THE 10TH INTERNATIONAL MULTI-CONFERENCE
ON ENGINEERING AND TECHNOLOGY INNOVATION 2021 (IMETI2021)**

PREFACE

It is my great honor and pleasure to organize this Special Issue of *Sensors and Materials*, which presents 10 papers selected from the proceedings of the 10th International Multi-Conference on Engineering and Technology Innovation (IMETI2021), held from November 29 to December 2, 2021, in Taoyuan, Taiwan. The articles in this Special Issue focus on the latest findings and innovative applications of sensors, including fundamental studies, industrial practices, and engineering innovations that apply sensor technologies. All of the articles went through a rigorous peer review by at least two reviewers. Acceptance for publication in this Special Issue was based on the reviewers' recommendations, mandatory revisions, and a final examination by the Guest Editor. These articles raise key issues that are expected to motivate researchers to explore sensor technologies.

I would like to express my deepest appreciation to the reviewers for taking the time to comment on the papers. Moreover, I would like to thank all the authors for contributing their original work to this issue. Lastly, special thanks are extended to Prof. Makoto Ishida, Editor-in-Chief, and Ms. Naoko Makino, Editorial Department of MYU K.K., for their kind and professional support in the publication of this Special Issue.

Prof. Wen-Hsiang Hsieh
