

**SPECIAL ISSUE ON THE 14TH INTERNATIONAL MULTI-CONFERENCE ON
ENGINEERING AND TECHNOLOGY INNOVATION 2025 (IMETI2025)**

PREFACE

This Special Issue features six meticulously selected papers from the proceedings of the 14th International Multi-Conference on Engineering and Technology Innovation (IMETI 2025), held from October 24 to 28, 2025, in Taichung, Taiwan. These articles highlight emerging advancements and innovative applications in sensor technologies, illustrating the breadth and depth of active research across this rapidly evolving discipline. To ensure the highest academic standards, every submission underwent a rigorous peer-review process involving at least two independent expert reviewers. Final selection was determined on the basis of reviewer evaluations, successful completion of mandatory revisions, and a comprehensive editorial assessment. We anticipate that these contributions will serve as a valuable reference and inspire continued innovation in sensor technologies and related fields.

It has been a great honor and privilege to serve as the Guest Editor of this Special Issue for Sensors and Materials. I wish to express my sincere gratitude to all the authors for contributing their original research. My heartfelt thanks also go to the reviewers, whose thorough evaluations and constructive suggestions were instrumental in refining the technical quality of this issue. Lastly, I extend my deep appreciation to Editor-in-Chief Professor Kohji Mitsubayashi and Ms. Naoko Makino of the MYU K.K. Editorial Department for their invaluable guidance, constant encouragement, and professional assistance throughout the publication process.

Professor Wen-Hsiang Hsieh
